DETAILED ACTION

1. The amendment filed 14 January 2008 has been accepted and entered.

Allowable Subject Matter

2. Claims 1-11, 13-17, and 22-30 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art of record does not disclose or reasonably suggest, along with the other claimed limitations, a non-circular orbit detection method the steps comprising: namely, storing a first sensing position; storing a second sensing position; and then calculating a non-circular orbit about a patient using said stored first and second sensing positions. For additional reasons of allowance, please refer to the previous office actions.

Regarding claims 2-10, the balance of claims is found allowable due to their dependence upon an already allowed claim and lacking any technical errors.

Regarding claim 11, the prior art of record does not disclose or reasonably suggest, along with the other claimed limitations, a method for orbital calculation the steps comprising: namely, performing the steps of a) and b) automatically. For additional reasons of allowance, please refer to the previous office actions.

Regarding claim 13, the prior art of record does not disclose or reasonably suggest, along with the other claimed limitations, the prior art of record does not disclose or reasonably suggest, along with the other claimed limitations, a non-circular orbit apparatus comprising: namely, wherein the front surfaces of the first detector element and the second detector element are at an angle of substantially 90 degrees from one another,

and wherein the first sensing direction is substantially vertically downward. For additional reasons of allowance, please refer to the previous office actions.

Regarding claims 14-17 and 22-24, the balance of claims is found allowable due to their dependence upon an already allowed claim and lacking any technical errors.

Regarding claim 25, the prior art of record does not disclose or reasonably suggest, along with the other claimed limitations, the prior art of record does not disclose or reasonably suggest, along with the other claimed limitations, a non-circular orbit calculator comprising: namely, means for storing positions of first and second detector elements when the sensors respectively detect first and second points of a patient; and means for calculating a non-circular orbit about the patient based on the stored positions of the first and second detector elements. For additional reasons of allowance, please refer to the previous office actions.

Regarding claim 26, the balance of claims is found allowable due to their dependence upon an already allowed claim and lacking any technical errors.

Regarding claim 27, the prior art of record does not disclose or reasonably suggest, along with the other claimed limitations, a method for nuclear medicine imaging with at least one detector following a non-circular orbit the steps comprising: automatically determining a plurality of orbital locations; and automatically predetermining a non-circular orbit. For additional reasons of allowance, please refer to the previous office actions.

Regarding claims 28-30, the balance of claims is found allowable due to their dependence upon an already allowed claim and lacking any technical errors.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

4. Applicant's arguments, see page 7 of the amendment, filed 14 January 2008, with respect to claims 1-11, 13-17, and 22-30 have been fully considered and are persuasive. The rejection of claims 11, 13-20, and 23-24 have been withdrawn in light of the amendments to the claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 5,777,332 A – Lonn discloses an orbital calculation method.

US 6,204,503 B1 – Pierfitte discloses dual detector head tomographic methods.

US 6,147,353 A – Gagnon discloses dual detector parallel hole collimated tomography.

US 5,677,535 A – Stephan discloses a light beam proximity sensor for tomographic detector heads.
